Last Updated Friday, 30 November 2007

We at Encore Web Marketing want to welcome you to a unique new way to invest in real estate.

Obviously, like most real estate investors, you know there is no better or secured way to accumulate wealth than real estate appreciation.
“95% of all millionaires made their money on real estate appreciation.”

You also know such a great investment vehicle has its down side; e.g., vacancies, negative cash flow, costly repairs.

Here’s a thought:

- No vacancies
- No repairs
- Positive Cash Flow!

We have the solution to the down side of real estate investing. That’s right! No vacancies, no repairs, positive cash flow and a minimum of 150% cash-on-cash return within one year and one day [based on past results].

If you don't think what you have just read is possible, let us show you the possibilities at our next Webinar.
